

AZ-900 (Aug 12-13)

Hi Reza Sir, with most large-scale enterprises increasingly adopting Infrastructure-as-Code (IaC) tools such as Terraform, do you have plans to introduce training on Azure infrastructure provisioning and management using IaC tools like Terraform?

Thanks, you might find existing training material on the O'Reilly portal

<https://learning.oreilly.com/search/?q=terraform&rows=100&language=en>

You can reach out to O'Reilly support and suggest the content you like, and the trainer, and they will consider them.

Good luck!
